SYSTEM AND METHOD FOR MODIFYING A DOCUMENT FORMAT

By David Emmett and Ahmad Rahman

Abstract

5 A system and method are disclosed for modifying a document format. In one
embodiment, a structure of a first document is extracted to form a first data structure.
The first data structure is then modified to form a second data structure. Content from a
second document is extracted from the second document and inserted into the second data
structure to permit display of the content of the second document in the format of the
10 second data structure.
